Kapunda High School BYOD Recommendations for Devices

- **Storage**: <u>must</u> have an SSD Hard drive 64 gb or above. SSD drives have no moving parts and are therefore less likely to be damaged.
- **Battery life**: 6 - 8 hours - to last the whole school day.
- **Screen size**: at least 10 inches. For students undertaking Design and Technology courses, a larger screen may be more suitable.
- **Highly recommend**: **Windows or Mac** Laptops.
- **Not recommended**: Android and IOS tablets - will **not** support all required applications for all subjects and may make it difficult for entry of written assignments.
- **Processing power**: Most new laptops will have adequate processing power. Whilst the higher i5 or i7 processors will give better performance, they are not necessarily required for school applications.
- **RAM**: 4 gb minimum.
- **Warranty**: recommend 3 years.
